SUMMARY

B.Tech student specializing in Artificial Intelligence and Machine Learning with strong skills in data structures, machine learning, and full stack development. Experienced in building AI-driven solutions for real-world problems, including predictive systems and smart monitoring applications. Seeking an internship opportunity to contribute to research and development in AI, data science, and intelligent systems.

EDUCATION

MAIT, GGSIPU

Bachelor of Technology in CSE (AIML), CGPA: 8.1

Delhi, India

3rd Year | Currently Pursuing

Govt. Boys Sr. Sec. School, Mohan Garden

CBSE, 12th, Percentage: 82%

Delhi, India

Apr. 2022 – Jan. 2023

Govt. Boys Sr. Sec. School, Mohan Garden

CBSE, 10th, Percentage: 87%

Delhi, India

Apr. 2020 – Jan. 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++ (DSA), Java, MY SQL, HTML/CSS

AI/ML: Scikit-learn, Pandas, NumPy, EDA, Model Evaluation

Web Development: React, Node.js, Express, Flask, FastAPI, Django, REST APIs, PostgreSQL, MongoDB, SQLite, Drizzle ORM

Blockchain & Web3: Blockchain concepts, Web3, Decentralized Identity, Smart Contracts (conceptual), Account Aggregator APIs

Tools & Platforms: Git, GitHub, VS Code

PROJECTS

StockClear – Dead Stock Marketplace | Solo Project |

Apr 2026

- Built a full-stack responsive marketplace platform connecting sellers and buyers for unsold inventory in India.
- Implemented dynamic pricing system with real-time quantity-based discount calculation and INR currency formatting.
- Designed buyer, seller, and admin roles with dashboards for product management, orders, and analytics.
- Applied business logic for commission-based transactions and flexible single/bulk purchasing.

MEDLINK-AI – Digital Health Ecosystem Platform | Solo Project | [GitHub](#) |

Feb 2026

- Developed a healthcare platform for centralized patient record and hospital workflow management.
- Implemented Digital Health ID, QR-based access, and secure patient-controlled medical data sharing.
- Built emergency treatment workflows with face identification for unconscious or unverified patients.
- Integrated lab reports, AI-generated summaries, and real-time health record synchronization.
- Designed scalable full-stack architecture using React, TypeScript, Node.js, Express, and Drizzle ORM with SQLite/PostgreSQL support.

CrediFlow – AI-Based Credit System for Gig Workers | Team Project (2 members) |

Nov 2025

- Developed a blockchain-based fintech platform enabling verified digital credit identity for gig workers and underserved users.
- Implemented AI-driven credit scoring using real-time cash flow, spending behavior, and alternative financial data analysis.
- Built consent-based financial data sharing and decentralized identity workflows for secure and transparent lending.
- Designed scalable architecture using AI/ML, Blockchain, Web3, Flask/Django, and Account Aggregator-based financial systems.

TravelSafeAI – Smart Tourist Safety Monitoring System | Team Project (2 members) | [SIH Project](#)

Sep 2025

- Built an AI-based intelligent monitoring system using anomaly detection and geo-fencing for threat identification.
- Implemented real-time emergency alerts to improve response efficiency and situational awareness.
- Explored blockchain-enabled identity management for secure authentication and monitoring.
- Worked in a team environment to design scalable and innovative public safety solutions.

MediVenture – Drug Inventory & Supply Management Platform | Team Project (2 members) |

June 2025

- Developed an AI-powered healthcare supply chain platform for real-time drug inventory tracking and redistribution.
- Implemented demand forecasting and smart stock transfer recommendations to reduce shortages and medicine wastage.
- Built centralized multi-branch inventory management with expiry monitoring and automated alert systems.
- Integrated secure APIs and blockchain-based transparency concepts for vendor accountability and data integrity.
- Designed scalable SaaS architecture using Python, Flask/FastAPI, SQL/MongoDB, cloud services, and real-time dashboards.

EXPERIENCE & ACTIVITIES

Member, Startup Sphere Society (ITE MAIT)

Aug 2025 – Active

- Collaborated with teams on startup-focused AI and SaaS ideas.
- Participated in technical discussions, pitch sessions, and innovation activities.

ACHIEVEMENTS & CERTIFICATIONS

- Winner – Pitch Your Idea 3.0.
- Finalist – XCELERATE 3.0 Ideathon, Shiv Nadar University.
- Finalist – CodeVeda 2.0 Hackathon, ADGIPS.
- Participated in 5+ national-level hackathons and innovation competitions.
- Participated in multiple Cybersecurity CTF competitions.
- Participated in AI/ML workshops, coding sessions, and technical discussions.
